Buying Liners in Plant Bands Means Money in Your Pocket

You save money buying plants in Plantbands as compared to plants from 2½" clay pots, because:

1. Plants in bands are moved by the flatful; plants in clay pots must be handled individually. Much labor is saved.
2. Plants in bands are shipped in the bands; plants from clay pots must be knocked out and placed in paper pots. Expense is eliminated.
3. Plants in bands arrive in good order because the bands hold them firmly together; being cubical in shape, they pack well. Potted plants, shifted to paper pots, pack loosely, and take a beating in transit. Losses are prevented.
4. Plants in bands have nearly twice as much soil about the roots as does the usual 2½" pot. They will ship farther, and still remain in moist condition. More losses prevented.
5. Plants in bands transplant better, because of the large amount of soil about the roots. It holds moisture longer, insuring better stands.
6. If plants in bands arrive at an inconvenient time, they can be set up in flats and left for indefinite periods before being planted. Plants from small clay pots must either be repotted or planted at once.
7. Banded plants handle easily and quickly in the field. No pots to haul out, gather, and wash. It costs less to plant them.
8. The plant bands we use are made of cypress. You can actually set them up in flats and carry them until August without repotting or rebanding. You can do more things with them with less cost.

Such of these savings and eliminations of expense as can be made here are passed on to you in the form of lower prices.

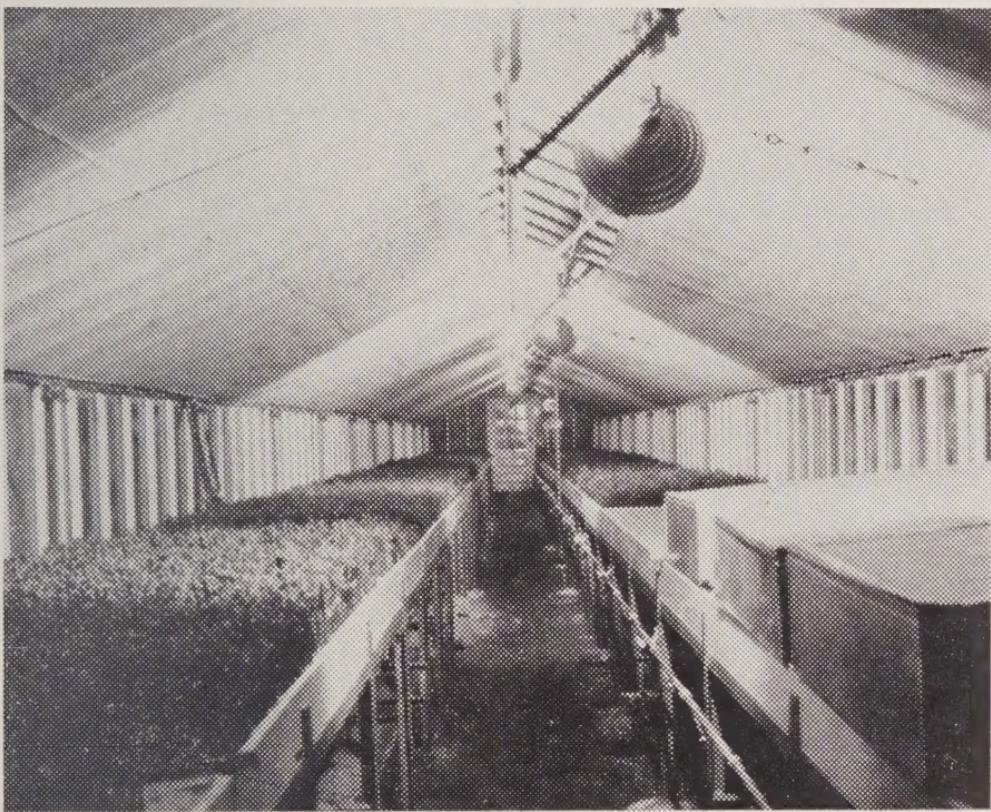

A "Full House" - 150 ft., all in bands, growing frantically,
and getting ready for the spring rush.

Banded Shrubs and Evergreens

RATES: Prices are 100 rates; 25 or more at 100 rate; add 3c each for less than 25 of a variety.

DELIVERIES: Read our comments under "Method of Delivery" for delivery information.

	100 rate price ea.
ABELIA grandiflora. (Bush Arbutus)07
AZALEA mollis. (one year seedlings, nice)10
AZALEA kaempheri hybrids. Mixed colors, mostly deep pink10

VIBURNUM tomentosum plicatum (Jap. Snow ball)10
VIBURNUM rhytidophyllum. (Leatherleaf Viburnum) ..	.10
WEIGELIA Eva Rathke. (Redflowering Weigelia)06 1/2

JUNIPERS

As a rule Junipers will not root early enough to be shipped in May with other liners. Pfitzers, Pfitzeriana nana, Savins, horizontalis, Sargents and von Ehron are slower than pfitzeriana compacta, dep. plumosa and hetzi. These slower rooting varieties will be forwarded later on most orders, and orders will be filled in the rotation received, as far as possible.

JUNIPERUS chin. pfitzeriana. (Pfitzers Juniper)10
JUNIPERUS chin. pfitzeriana compacta. (Compact Pfitzers Juniper)10
JUNIPERUS chin. pfitzeriana nana. (Very dwarf form of Pfitzers)12
JUNIPERUS com. depressa plumosa. (Andorra Juniper) ..	.10
JUNIPERUS com. hibernica. (Irish Juniper)10
JUNIPERUS glauca hetzi. (Hetzs Blue Juniper)10
JUNIPERUS sabina. (Savin Juniper)10
JUNIPERUS excelsa stricta (Greek Juniper)18

Method of Delivery

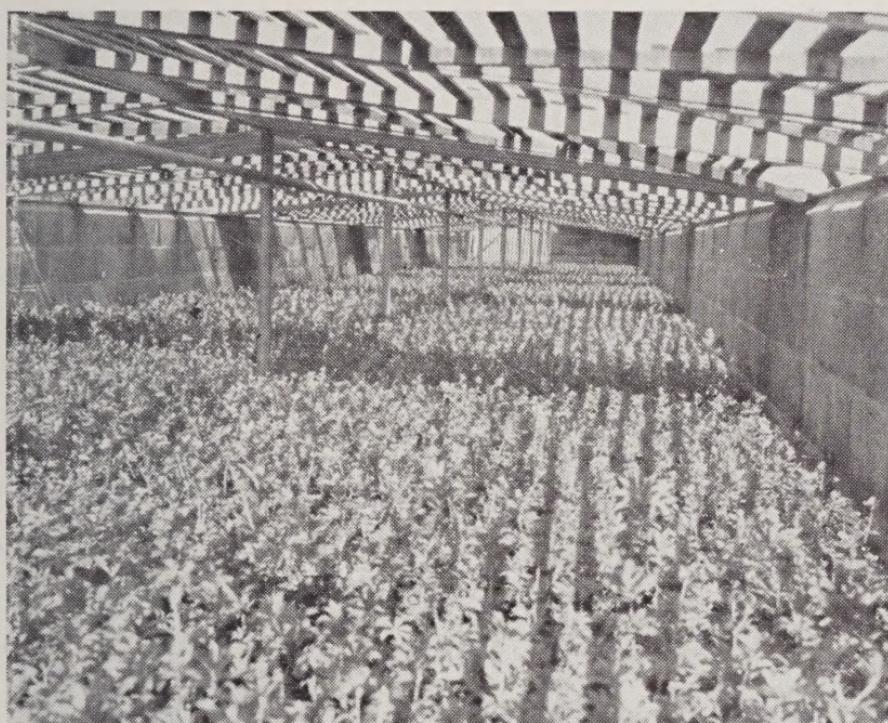

Perennials from field will be shipped by parcels post or express. Plants in bands and pots will be delivered by our trucks insofar as it is practicable. Nearly all sections of Pennsylvania, New Jersey, Maryland, Delaware, the northern half of Virginia, north-eastern West Virginia, the eastern half of Ohio and southern New York State are within our trucking area. Most forms of transportation are either too costly or too slow; and all are pretty rough on plants in less than carloads. So we have made it a practice to deliver shipments of 1000 potted plants or more, wherever it is at all possible. Even if your order is for less than 1000 plants in bands, if you are located so that we can group your shipment with others, truck delivery will be made. Our charges for delivery will be reasonable, and your plants will be handled carefully.

On lots which cannot be handled by our own trucks, shipment will be made by Motor Express, Parcels Post, or Railway Express, whichever appears most advantageous for you.

3" POT STOCK

Always, somebody insists upon larger plants than plant bands will accomodate. Therefore these plants in 3" pots.

We transplant from plant bands to 3" pots, instead of 2 1/4", for several reasons. You can't crowd a 2" plant band into a 2 1/4" pot. And there would be no object in doing so. 2 1/4" pots set close together wouldn't give the tops any more room for development than the plants would have in plantbands. And there wouldn't be as much room for roots in 2 1/4" pots as in plant bands. To develop nice tops and provide the needed root space, 3" pots are the ideal "shift" from plant bands.

One of three block and steel coldframes. This one is filled with Pieris and Azaleas.

Nearly everyone who produces stock in clay pots knocks the plants out and ships in paper shipping pots. We find it costs us as much for paper shipping pots and the labor for the knock-out process as it costs us for clay pots bought in large quantities. So we ship in the clay pots. Think of the convenience to you! Unpack the plants and place them where you want them until you are ready to plant them. No repotting and no "jam session" to get the plants in the ground right away.

DELIVERIES: Read our comments under "Method of Delivery" for delivery information.

NOTE: Priced per 100; 25 or more at 100 rate; add 3c for less than 25 of a variety.

Perennial Liners

in Plant Bands

Ah, here's where we shine! We like to propagate perennials, and we like the very nice commentaries we get from many of our customers about these perennial liners. The plants look nice when they go out, they make an excellent impression when you get them, and that makes everybody happy. It is so simple for you to handle them. Just unpack them and set them up in flats so that you will have the varieties sorted. (Cases will be marked, plants labeled). Take the flat and all to the field, draw a furrow about 4" deep, drop the whole package, band, soil and all, in its proper place, press the soil against them, and the job is done. No pots, no shading, little cost, and no worries.

They are shipped in the 2-inch bands, in about the same amount of soil as it takes to fill a 2½" pot. Actually they never know they have been moved. Just moisten them in the flat before you take them to the field, and that will give them all the moisture they will need to start.

Read our comments under "METHOD OF DELIVERY" for information about deliveries.

NOTE: Priced per 100; 25 or more at the 100 rate; add 3c each for less than 25 of a variety.

**YOU CAN'T GET JAPANESE BEETLES
FROM US!**

**Everything we have on the place, including stock
in pots, bands and in the field is certified by the
U. S. D. A. to be free of Japanese Beetles. Ask
for certificate if your's is a certified nursery.**

SPECIAL CASH DISCOUNT

A discount of 5% will be allowed on all orders for banded and potted plants received before February 15th accompanied by cash in full. Discount does not apply to perennials from field or plantbands.

Perennials from Field

You can make more money selling your customers our perennials! Our plants are bigger and huskier, and you can get premium prices for them. Our variety list is like canned soups in a grocery store: every single item is a "best seller." We can give you prompt service; and you will find the plants properly packed.

We call your particular attention to the Asters, Dicentras, Gypsophilas and Phlox, all of which we have in comparatively large quantities. If you can use large lots of these, ask for special quotations.

NOTE: Priced per 100; 25 or more at 100 rate; add 3c each for less than 25 of a variety; double 100 rate for less than 10 of a variety.
